

Dr. Creusere Receives Professorship

On Friday, Oct. 31, during Homecoming 2008 celebrations, the College of Engineering at New Mexico State University announced the appointment of Dr. Charles Creusere to the newly-established *IFT Professorship in Telemetry and Telecommunications*. The new professorship was made possible by the generosity of longtime college supporters.

Charles D. Creusere, associate professor at the Klipsch School of Electrical and Computer Engineering, is the first recipient of the International Foundation for Telemetry Professorship in Telecommunications.

Creusere received his bachelor's degree in electrical and computer engineering at the University of California, Davis. He went on to receive his master's and doctoral degrees in electrical and computer engineering at the University of California, Santa Barbara. Creusere joined the faculty of the Klipsch School at NMSU in 2000.

Creusere is a member of several technical program committees for the IEEE. Creusere was the associate editor for IEEE Transactions on Image Processing from 2002 to 2005 and began serving as the associate editor for IEEE Transactions on Multimedia in 2008.

The International Foundation for Telemetry has supported the Klipsch School through the establishment of graduate fellowships and was key in establishing the *Frank Carden Chair in Telemetry and Telecommunications*, which has played a central role in the development of a nationally recognized program in this important area. The *Carden* chair was the first chair to be established at NMSU.
